-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. The restriction requirement filed 3/24/05 has been withdrawn. Any new claims should be submitted with consideration of the present claims (1-39 and 43-48) as an original presentation.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 18, 33, 39, 45 and 48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the last line of claims 18, 33, 39, 45 and 48, the phrase “through overlapping applications” renders the claims indefinite because it is not clear as to what “overlapping applications” is referring. The claims do previously recite a limitation to “repetitively applying” but the connection to the rejected phrase and “repetitively applying” phrase is not made by the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2873

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-39 and 43-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Bowman et al. (6861205).

Bowman discloses, as in claims 1-39 and 43-48, the claimed invention by disclosing the application of a plurality of layers of photosensitive materials, to create a three-dimensional structure made of many layers on top of one and another, which is done simply by adding additional successive layers of photosensitive material and applying an external stimulus to each successive layer of photosensitive layers (see col. 3, line 4 through col. 4, line 51). With regard to the limitation of the maximum thickness and predetermined film thickness, these limitation are considered to be inherent since adding a layer beyond what is the considered to the be maximum thickness would not meet the sought dimensions of the three-dimensional structure and the predetermined thickness is merely the thickness intended for the successive layers.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Amemiya (EP 1045288 A2) is cited for disclosing a multiple exposure process to a substrate.
